HEATED BASE LAYER TOP L/S

DESCRIPTION

This heated base layer is constructed from a soft, brushed-back performance fabric designed for thermal insulation, with low-profile integrated heating elements at front and back abdomen for consistent heat distribution. A three-level heat control button allows temperature regulation and a rechargable battery pack that offers up to 4 hours of battery life is included.

COMPOSITION

100% Polyester, knitted with brushed back, 150g

100% Polyester, knitted with brushed back, 150g
